## CDU (Compact Delivery Unit)

The CDU is the perfect logistical/delivery solution for brewery's who pursue flexibility, customer care and managing finance and registration.

The Compact Delivery Unit is designed to be flexible and fits in any truck. It allows the brewery to use his transport vehicle not only to deliver beer, but also have the possibility and space for other purposes.

The CDU is developed with a system to monitor the amount of litres delivered and generate a delivery report. The report states the delivered amount, date and time of the delivery and customer details. With an easy to use control unit, the requested data can be generated. The CDU is certified according the EEA /EU legislation Measurement Instruments Directives (MID).

By combining the CDU with transport tanks, the perfect delivery flexibility becomes reality. The CDU also allows breweries to benefit from the advantages of transporting beer in tanks, without having to do large investments in dedicated delivery trucks. A CDU with transport tanks is a modular solutions that is able to adapt to the growth of the brewery.

#### Specifications

Specifications	
Material	Stainless steel (304/1.4301)
Dimensions (L x W x H)	2386 x 1048 x 1286
Weight	± 760 Kg.
Delivery unit	Mounted in a stainless steel (304/1.4301) frame
Hose winder	60 m delivery beer hose NW25
Air compressor	1,5 KW with 2x a 120 liter air tank (for a 10hl beer tank)
Calibrated flow meter	DN 25, 0-16m <sup>3</sup> /h
Control unit	MID certified using DFC / Siemens S7 / GEA Diesel
Electric cord reel	With slide contacts and 50 m hose
Power supply	1 x 230 Vac + N + PE. 16 Amp.
Pump	1.000 L p/15 minutes
Options	Heavy duty wheels, Branding plates
